DETAILED ACTION

Claims 1-25 are pending in this application for consideration.

Claim Objections

Claims 7, 19 and 25 are objected to because of the following informalities:

In claims 7, 19 and 25, at line 2, "is" should be changed to - - in - - at second occurrence.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claims 14, 16-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 recites the limitation "said dissolving" in line 1 and "the oxide material" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 15 recites the limitation "the fluoride salt" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

Claims 1-13 and 21-25 are allowed over the cited prior art.

Claims 14-20 would be allowable if rewritten or amended to overcome the rejection under 35 U.S.C. § 112.

Reasons For Allowable Subject Matter

The following is an Examiner's statement of reasons for the indication of allowable subject matter:

Art Unit: 1746

None of the prior art discloses or suggests a method of removing oxide from a crack substrate by heating the slurry of fluoride salt and the substrate to the melting point of the salt or reacting the molten fluoride salt with the oxide of the crack in the substrate.

The closest cited prior art sees et al (6,019,806) disclose a method of removing oxide from a substrate by using a slurry, which include a fluoride salt but fails to include a step of melting the fluoride salt slurry by heating the slurry paste.

Zimmerman, Jr. et al (6,379,749) discloses a method of removing ceramic coating from gas turbine components by use a aqueous solution of acid fluoride salt such as ammonium bifluoride salt. The reference fails to disclose a step of heating the fluoride salt to the melting point of the fluoride salt.
